SUMMARY

A Master of Networking graduate seeking a position in the Information Technology field as a Network Security Specialist. I bring a unique blend of tenacity, innovativeness, troubleshooting, leadership skills, precision, and a very high level of motivation. I am an independent person with strong analytical skills who thrives in fast-paced environments and is driven by continuous growth, challenges, and achieving results.

EXPERIENCE

Software support

Source Code

June 2019 - November 2019, Kathmandu Nepal

- Trained the clients on accounting software and provided with high-quality customer service.
- Solved client technical issues through the remote application so that the client's work runs smoothly.
- Worked on marketing software called BOSS (BROKER OFFICE SOLUTION SOFTWARE).
- Reported bugs and errors in the software.
- Software testing in a Quality Assurance team and testing the changes constructed to the accounting software.
- Involved in Search Engine Optimization (SEO) for the websites to reach out the potential customer.

Front End Developer

Semantic creation

July 2018 - October 2018, Kathmandu Nepal

- Front End Development with HTML, CSS, JSON, JavaScript and framework Bootstrap.
- Communicating with clients regarding projects and fixing bugs and errors in the software.
- Basic usage of Google Analytics, Version Control Systems with Git.
- Involved in data visualization with High charts.

PROJECTS

Autonomous UV Disinfection Robot

Mar 2021 – Oct 2021

Melbourne Institute of Technology, Melbourne, Australia

- Designed and developed an autonomous robot using simulator to disinfect healthcare environments with UVC light, minimizing human exposure to infectious diseases such as COVID-19.
- Built a mobile application in Java (Android Studio) enabling real-time task assignments, disinfection status tracking, and duty completion notifications.
- Delivered seamless user experience and efficient back-end communication between the mobile app and robot system.
- Collaborated with the team to integrate features such as robot movement control and sensor-based automation to detect humans/animals and automatically disable UVC lights to ensure safety.
- Gained practical experience in mobile development, sensor-based automation, and robotics integration for health and safety applications.

Bug Tracking Software

Aug 2018 – Jan 2019

Leeds Beckett University, Kathmandu, Nepal

- Developed a bug tracking system using C# that allows users to upload files and automatically detects any bugs or issues within the code.
- Implemented real-time bug detection, categorization, and status tracking for efficient issue resolution.
- Designed an intuitive interface for users to manage and track bugs, streamlining the development process.
- Gained hands-on experience in C# development, bug tracking, and automating file analysis processes, supporting faster bug identification and resolution in software development environments.

OTHER EXPERIENCE

Chef

Middle Southeast Cafe

December 2024 - Present, South Yarra, Vic

- Prepared and cooked a variety of breakfast and lunch dishes in a fast-paced café environment.
- Ensured food presentation and portion control met café standards, maintaining consistency under pressure.
- Managed kitchen hygiene and food safety compliance in accordance with HACCP guidelines.
- Collaborated with front-of-house staff to ensure smooth kitchen operations and customer satisfaction.
- Improved time management and multitasking skills by meeting tight service deadlines.
- Helped train junior staff, which strengthened leadership and communication abilities.

EDUCATION

Professional Year

ECA Professional Year • Melbourne • Present

Master of Networking

Melbourne Institute of Technology • Melbourne, Australia • 2020–2021

• **Grade:** 5.5 CGPA

Bachelor of Science in Computing

Leeds Beckett University • Kathmandu, Nepal • 2015–2019

• **Grade:** Upper Second-Class Honors

SKILLS

Networking Skills:

Network Configuration (Cisco Routers & Switches) | LAN/WAN | TCP/IP | DHCP | DNS | VLAN | VPN | Network Monitoring | Firewalls | Routing & Switching | Network Security

Security Tools:

Wireshark | Kali Linux | Nmap | Packet Tracer | Metasploit

Programming:

Java | Python | Front-End Web Development

Database:

MySQL

Operating Systems:

Linux | Windows

Other:

MS Office Suite | Git

Interpersonal Skills:

Team Collaboration | Time Management | Leadership | Problem Solving | Analytical Thinking | Detail-Oriented
